## INTERVIEW SUMMARY

Sir:

Pursuant to 37 C.F.R. § 1.133(b), the following is a summary of an interview that occurred on 21 April 2004 conducted between the undersigned and examiners Brian Healy and Daniel J. Petkovsek. An Applicant Initiated Interview Request Form is enclosed herewith as the interview was scheduled by the examiners.

Applicants' representative initially described the primary features of the invention for the benefit of examiner Healy. Applicants' representative then requested the examiners to clarify the basis for rejection of the claims under 35 U.S.C. § 112 made in the final action dated 1 March 2004. Only the pending independent claims 1 and 7 were addressed for purposes of the discussion..

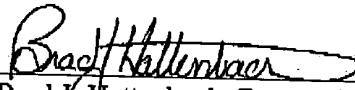

The examiners stated the primary issue in the rejection was that they did not understand how the structural limitations recited in the claims could lead to the claimed results. The

Appl. No. 09/964,927  
Interview Summary 21 April 2004

relationships between the limitations in claims 1 and 7 were discussed. Applicants' representative indicated that he would draft alternate claims based upon claims 1 and 7 for consideration in view of the examiners' comments. It was further discussed that the inclusion of some claims to clearly recite the individually addressable nature of the quantum dots in one embodiment of the invention might be helpful. Applicants' representative also suggested that perhaps an affidavit from one skilled in the art discussing the theory behind why the claimed invention achieves the claimed results would be appropriate. The examiners indicated that such an affidavit might be helpful and would be considered.

Applicants' representative indicated that a request for continued examination would be filed in order for new proposed claims and an affidavit to be considered.

Respectfully submitted this 21<sup>st</sup> day of May 2004.
